

DAVID BLITZ

dblitz@uwaterloo.ca | www.linkedin.com/in/david-s-blitz

- SUMMARY:**
- **Technical:** Proficiency in Java, C++, Unity, Arduino, Verilog, Python, Pandas, MySQL, AI-Driven Development, and Web Development.
 - **Awards:** Multiple distinctions in national Math and Coding competitions and multiple scholarships totalling \$5000, including the University of Waterloo President's Scholarship of Distinction.
 - My internship taught me technical literacy and how best to use the technology around me to help cover my weaknesses and bolster my strengths
 - Succeeding in a hackathon showed me just how important time management and planning were in success, as that is what made the top teams stand out.
 - Being a Varsity athlete whilst managing a full class load exhibits my work ethic and time management in order to not fall behind academically nor athletically.

- EXPERIENCE:**
- Co-op Software Developer: Clarendon Technologies Inc.**
May 2026 - August 2026
- Assisted in full-stack development, testing, and maintaining web applications using .NET (C#, .NET, Core/Blazor) and PHP.
 - Implemented and upgraded a POS build for the Ski Anywhere rental system to streamline and digitalize the winter rental process.
 - Worked with relational databases including MySQL and SQL Server
 - Used AI coding tools to help implement features, remove bugs, develop in-depth testing criteria, and improve overall documentation.

- PROJECTS:**
- Eng hacks 2026 Winter Accessibility Hackathon - 3rd Integrated**
March 2026
- Designed and created a Dakota disk white cane prototype with embedded sensors to help the visually impaired navigate winter navigation.
 - Balanced time, budget, and limited materials over 12 hours, collaborating with teammates to build a working model
 - Researched and brainstormed potential ideas before deciding on a specific design that was effective in achieving our goal and allowed everyone to contribute with their strengths in the process.
- Addressing Hospital Induced Delirium Through Arduino**
September 2025 - December 2025
- Collaborated with group members to design and create a working prototype to meet specific design requirements.
 - Assisted in programming an Arduino Microcontroller system to operate as an elderly accessible communication system.
 - Underwent thorough research to understand where and how advancements can be made in the overarching problem of Hospital-Induced Delirium

- EXTRA CURRICULARS:**
- Varsity Rugby for the University of Waterloo**
- Developed strong teamwork and communication skills through practicing and playing with teammates.
 - Balanced 12+ hours of commitment a week with my academics throughout the season, whilst maintaining a CGPA of 85%

- EDUCATION:**
- University of Waterloo** 2025 - 2030
Candidate for a Bachelor's in Computer Engineering
- Playing Varsity Rugby on the University's team

- CERTIFICATIONS:**
- Introduction to Artificial Intelligence
 - Introduction to Quantum Computing
